

'Kaizen' activity by GMB

GMB has been undertaking various improvements of working practices, personal efficiency, etc. for many years.

We call this activity 'kaizen' here in Japan. Some may know this word because Kaizen has been adopted into the English language.

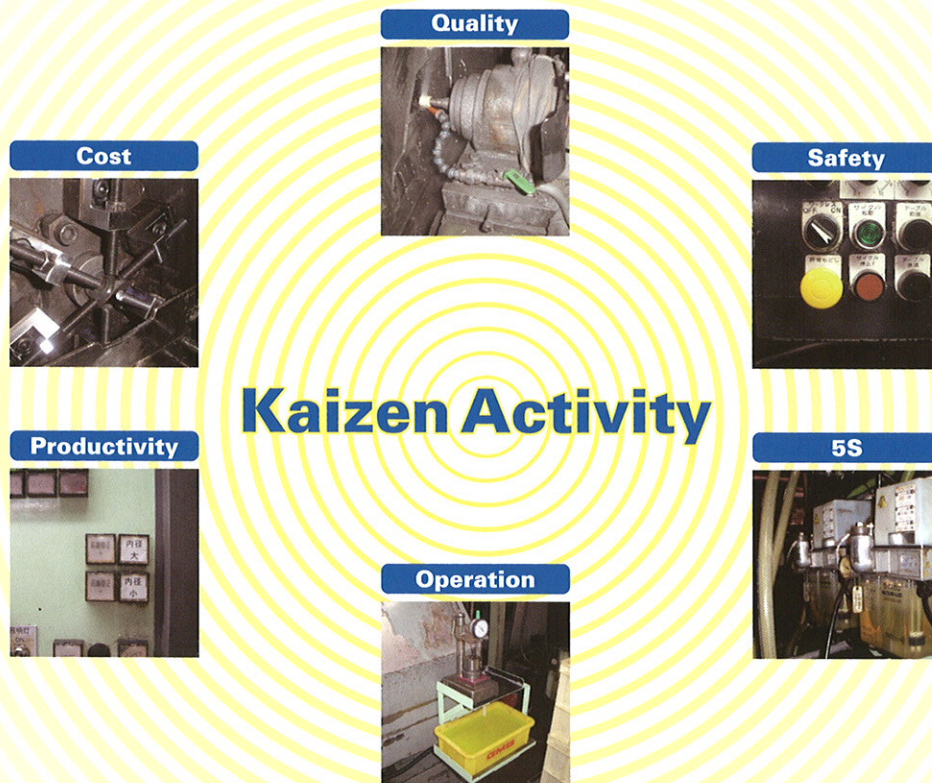

In 2008, one of GMB's employees won a prize from the Ministry of Education, Science, and Culture. This is of very great value, and of practical value for our company, too.

Especially this year, we think it is even more important for us to promote kaizen activity. The whole world is now facing recession, which has an influence on almost all fields and certainly including the automobile industry.

At the beginning of this year, many kaizen suggestions were submitted to improve quality, operation, safety, cost cutting and energy saving, etc.

Eventually, we believe that these various activities will lead to initiatives to provide our customers with better quality, price and delivery, too.

Auto parts are absolutely essential for our life, so GMB will keenly promote kaizen activity, not only for us, but also for our customers, from this time on.
