

***May I wish all customers of
GMB a Happy New year.***

Kazuo Namboku
President

Following a turbulent 2010, 2011 will be another year for us to smoothly respond to customer requests and ever-changing business situation. It will only be possible by vitalizing our corporate strength in all-out campaign.

GMB started IFRS introduction as well as actions for plenty of earthly concerns (CSR and environment etc.) with our high spirit and enthusiasm. After all our efforts we see signs of improvement for the future. GMB group companies will make sure, with our joint efforts, to serve you more effectively for your success.

2011 New Year Message and something more,,,,,

Year 2011 opened quietly without extravaganza but we feel that the global economy is speeding up but with much variation in different areas. GMB assures you that we will redouble our efforts to reduce and control the unpercedented backlog enduring from the last year. GMB has learned very much last year to manage the ever- expanding and complicated logistic line of components. GMB shall be fully equipped with the backup facilities and suppliers by fine tuning our forward planning...

We must facilitate all colleagues and partners in the world with improved service so that your success will help our future.

Shuji Kuwamura
Executive director, Sales HQ.
